The Clinical Effectiveness of Neurolinguistic Programming
Dynamic Learning is about a revolutionary new approach to learning and teaching. The authors present leading edge methods and techniques that improve the ability to learn in a variety of areas, offering stimulating exercises and step-by-step procedures that help you to make better use of the most valuable resource you have—your brain.

Nurses Taking the Lead
Despite widespread use, Neurolinguistic Programming (NLP) is a topic of much debate, often receiving criticism from academic and professional sectors. In this book international academics, researchers and therapists are brought together to examine the current evidence of the clinical efficacy of NLP techniques, considering how NLP can be effective in facilitating change, enrichment and symptom relief. Lisa Wake and her colleagues provide a critical appraisal of evidence-based research in the area to indicate the benefits of the approach and identify the need for an increase in randomized well-controlled clinical trials. Contributors also explore how NLP has been used to treat various disorders including: post-traumatic stress disorder, phobias, addictions, anxiety disorders, mild depression. Illustrated throughout with clinical examples and case studies, this book is key reading for practitioners and researchers interested in NLP, as well as postgraduate students.

The User's Manual for the Brain Volume I
Understanding NLP opens a doorway into a more imaginative and coherent way of understanding and using NLP. This completely revised edition unites the many strands of NLP using an elegant paradigm which Peter Young calls the Six Perceptual Positions model. The book provides numerous examples of the paradigm in practice.

Understanding NLP - second edition
The most comprehensive NLP Practitioner course manual ever written. A fully revised and updated edition, it contains the very latest in Neuro-Linguistic Programming, particularly with regard to the Meta-states model and the Meta-model of language. For all those embarking on Practitioner training or wishing to study at home, this book is your essential companion. Written and designed by two of the most important theorists in NLP today.

The 21st Century Manager
The purposes of the series Strategies of genius is to apply the tools of neuro-linguistic programming to analyze important historical figures in order to produce practical and effective strategies that can be learned and applied in other contexts. By analyzing quotations and anecdotes, the author describes the thinking processes of each individual studied and then shows how these processes may be used by the reader to enhance their own creativity and problem solving ability.
Rather than looking at theoretical leadership literature, this text brings together personal accounts of actual nursing leaders. This book is for nurses and nursing students, on what personal qualities go into being an effective leader. It offers alternative approaches to old problems.

The Neurophysics of Human Behavior
Concerned with the skills and motivation necessary for successful leadership, this text is based upon established NLP techniques and offers theoretical background to students of appropriate academic courses and to anyone interested in supporting and developing innovation projects.

Technological progress, underlining the importance of innovation for the improvement of business or the disruption of established models. The science of innovation aims to give a solid offers examples and shortcut rules to facilitate the comprehension for the reader. Moreover, the author explains the historic origins of innovation and its role in economy, business, and personal lives.

According to the author, the lack of improvement in management and leadership could also be able to sell their ideas to their own people and create the truly collaborative working environments in which continuous improvement can set roots and flourish.

The Sourcebook of Magic (Second Edition)
Most people assume that being right should be enough to be followed and respected as leaders. However, anyone attempting to lead any type of work organization, whether it be a classroom, a hospital, a team, or an enterprise, needs to know how to navigate a complex maze of challenges, constraints, and unexpected opportunities.

Consulting to Large and Small Systems
Large Systems covers how to work with large organizations, including organizational structure, terms, culture, and concepts, as well as processes such as change and resistance; how to

Consulting to Small Systems discusses working with teams and groups; planning and conducting training and teambuilding; diversity in the workplace and in consultation. Consulting to

Consulting: The Art of the Gourmet
Organizational Consulting: The User's Manual, Volume II
This book offers a comprehensive approach to innovation management. Based on a solid scientific basis, it provides concepts to initiate, pursue, target and supervise innovation projects through specific action steps. Suitable methods are given for inventions by development, research, forecast and creativity. Each chapter offers examples and shortcut rules to facilitate the comprehension for the reader.

Consultation Skills for Mental Health Professionals
This type of work challenges mental health professionals, drawing on all the skills and resources they may possess, yet also offers some of the greatest rewards and opportunities for service. Filled with numerous case examples and checklists, Consultation Skills for Mental Health Professionals contains a wealth of information on this important area of practice. It provides a comprehensive source for working with a diverse clientele in a variety of settings, discussing both traditional mental health consultation models and the fast-developing field of exits and entrances.

Exits and Entrances
Consultation interventions are an increasingly popular alternative to clinical practice, allowing the practitioner to interact with and affect many different individuals and organizations. This type of work challenges mental health professionals, drawing on all the skills and resources they may possess, yet also offers some of the greatest rewards and opportunities for service.
These concepts are successfully discussed in detail the collaborative technologies available today and how they can be used in client relationships, along with managing portfolios of communications channels. He also discusses firm-wide relationship management, leading relationship teams, and value-based pricing for knowledge-based client relationships. This is done by presenting underlying industries offer valuable insights into world leading practice in the field. He examines key client programs, and how to create deeper knowledge-based relationships through these. He reconnect you with your spirit, change negative beliefs and habits, heal emotional wounds and physical symptoms, deepen intimacy, and improve self-image and self-love. Along this path, we inevitably meet challenges and confronting these challenges forces us to develop and think in new ways and push us outside our comfort zone. The book takes the form of a transcript and method for intervention and modeling. It outlines the systematic, behavioral approach of NeuroPrint, promising to promote a deep understanding of the process of human change.

Sharing Experience in Engineering Design (SEED 2002) Developing Knowledge-Based Client Relationships, Second Edition, shows organizations how to lead their key clients into lasting, meaningful, and profitable relationships. This book provides the tools and methods for intervention and modeling of knowledge-based relationships, offering a comprehensive, practical guide to building long-term, successful partnerships. The book is organized into five key sections: understanding the client, building the relationship, managing the relationship, measuring the impact, and closing the loop.

Understanding the Client: This section focuses on the importance of understanding the client's needs, goals, and values. It provides strategies for conducting effective client interviews, analyzing client data, and developing personalized insights.

Building the Relationship: This section covers the development of trust, respect, and alignment with the client. It includes strategies for creating a seamless transition to the delivery of the service, managing expectations, and aligning with the client's priorities.

Managing the Relationship: This section focuses on the ongoing management of the client relationship. It includes strategies for resolving conflicts, negotiating contracts, and maintaining the relationship over time.

Measuring the Impact: This section provides tools and methods for measuring the impact of the relationship. It includes strategies for tracking key performance indicators, analyzing cost savings, and demonstrating the value of the relationship.

Closing the Loop: This section covers the importance of continuous improvement and ongoing optimization of the client relationship. It includes strategies for conducting post-program reviews, soliciting feedback, and adjusting the relationship to meet changing client needs.

To summarize, this book provides a comprehensive guide to building and managing knowledge-based client relationships. It offers practical tools and strategies for organizations to build lasting, meaningful, and profitable relationships with their clients. The book is essential for professionals in the fields of marketing, sales, and client management.
It's a story about family. And it's a story to remind us that we are all dreamers, bringing our own strengths wherever we roam. Beautiful and powerful at any time but given particular urgency as the status of our own Dreamers becomes uncertain, this is a story that is both topical and timeless. The lyrical text is complemented by sumptuously detailed illustrations, rich in symbolism. Also included are a brief autobiographical essay about Yuyi's own experience, a list of books that inspired her (and still do), and a description of the beautiful images, textures, and mementos she used to create this book. A parallel Spanish-language edition, Soñadores, is also available. Winner of the Pura Belpré Illustrator Award! EQ and Leadership In Asia
This essential new self-coaching guide will help students to discover their full potential and bring vitality to their PhD experience and beyond by developing self-sufficiency, resourcefulness and resilience.

Tools for Dreamers
Creativity Cycling is written for leaders who want to help their team solve complex problems by applying creative thinking skills. In a fast-changing world, new challenges frequently arise and complex problems benefit from creative thinking revealing new perspectives and opportunities. This book provides an overview of the conditions for creativity, both individual and team, and presents a tried and tested creative process for solving complex problems and envisioning the future.

Being Right Is Not Enough!
Playing with Purpose shows how a facilitator, coach, manager, people developer or trainer can invent or reinvigorate an artificial learning experience and make it so much more than a game. The authors look at a range of dilemmas, challenges and problems faced by anyone wanting to run memorable training sessions, classes and project meetings and then demonstrate how to get powerful lessons from the simplest of household and office objects and situations. The exercises and ideas outlined provide a focused examination of a range of training aims and outcomes including leadership, teamwork, communications, equality and diversity, feedback and personal effectiveness; as well as general energisers, closers and problems to be solved. Steve Hutchinson and Helen Lawrence believe that seeing their sustainable, creative approach to experiential learning explicitly laid out, will give you the confidence to develop your own solutions.

The Hero’s Journey
A book by Robert Dilts and Robert McDonald, Tools of the Spirit (1997) encompasses their approach to integrating basic NLP skills and tools with higher levels of experience. ‘Tools’ of the Spirit are aids which bring us more in harmony and alignment with the “larger Mind” and “larger nervous system” of which we are members.

Developing Knowledge-Based Client Relationships
With contributions from top geographers, this Companion frames sustainability as exemplar of transdisciplinary science (critical geography) while improving future scenarios, debating perspectives between rich North/poor South, modern urban/backwards rural, and everything in between. The Companion has five sections that carry the reader from foundational considerations to integrative trends, to resources use and accommodation, to examples highlighting non-traditional pathways, to a postscript about cooperation of the industrialized Earth and a prognosis of the road ahead for the new geographies of sustainability.

Communication & Cognition
Paradox in the Contrivance of Human Development
This book crosses disciplinary boundaries in a way that few books on human development do. Its strengths come from the fresh perspectives which emerge from the diverse fields that the author draws upon (e.g. Central Banking; Child Protection; Environment; Extension; Food Security; SMEs; Water and Sanitation to name a few). It is an anthology of the author’s recently published works with a leavening of contemporary material. The objective is to draw this rich material into a coherent whole that will meet the needs and interests of professionals, students and lay-enthusiasts alike. The author’s insights come from his extensive experience juxtaposed with an academic perspective and educative engagement. This experience has been gained over many years working with various international development agencies from multilateral and bilateral donors to International Financial Institutions, UN agencies, non-government organisations, national and local institutions. The supportive, underpinning scholarship is both eclectic and thoroughgoing, augmenting essays on anthropology, economics, environment, management, philosophy, psychology, and sociology. The end result is a unique exploration of the issues that confront the theory and practice of human development.

Consultation Skills for Mental Health Professionals
This much anticipated volume continues the tradition of Volume I, the Practitioner course manual. The authors now invite you to reach beyond Practitioner to Master level to develop the very spirit of NLP. "the quintessential self-study course on advanced NLP." Judith E. Pearson PhD

The PhotoReading Whole Mind System
In The Sourcebook of Magic you will discover afresh the basic 77 NLP patterns for transformational magic. This newly revised version streamlines the patterns so that they are even more succinct and offers some new insights into how the patterns work.
The purpose of this book is to examine the structure and principles of creativity in order to enhance and supplement the creativity and productivity of individuals, teams, and organizations. It applies Neuro-Linguistic Programming to make explicit the strategies and steps involved in the creative process on a number of different levels.

Clinical Reasoning
Chapters in this outstanding text are grouped into sections focusing on major themes. Each features an overview, a debate chapter, and several viewpoint chapters. This format gives students the opportunity to analyze conflicting viewpoints and encourages critical thinking. The text boasts a well-known and well-respected author group, allowing students to learn from recognized leaders in the field.
